About Me

Senior Software Engineer with 3+ years shipping FedRAMP-authorized enterprise applications, driving agentic AI adoption, and mentoring developers. Loves the elegance of math and the thrill of solving puzzles!

Work Experience

- **Senior Software Engineer** (June 2023 – Present)
Manhattan Associates, Atlanta, GA (Promoted from Full Stack SWE, Jan 2026)
 - Drove org-wide AI transformation for 15+ engineers, architecting agentic infrastructure: custom **MCP** servers, **RAG** pipelines, reusable skills, **multi-agent workflows**, and an **autonomous defect resolver**, cutting code-review cycle time and hardening delivery reliability.
 - Architected and shipped a fault-tolerant **Apache Camel** integration server on **Enterprise Integration Patterns** within an event-driven microservices architecture, **slashing data-transfer latency by 60%** while sustaining millions of requests.
 - Owned end-to-end delivery of full stack applications across large-scale, **FedRAMP-authorized** supply chain and warehouse management platforms serving **FEMA** and **DeCA**, processing millions of mission-critical transactions.
- **Software Engineering Intern** (May 2022 – July 2022)
Ventura Corporation, Reston, VA
 - Designed and delivered a full stack web application powered by a **K-means recommendation model**, collapsing user input time **from 73 to 8 seconds** (~89% faster).
 - Authored the team's **human-centered AI** guidelines for ethics and bias mitigation.
- **Machine Learning Intern** (Nov 2020 – May 2021)
Deep Cognition, Remote
 - Built and trained **CNN and RNN ML models** and authored tutorials for Deep Learning Studio.

Projects & Achievements

- **1st Place Capstone Award at VTURCS** (VT Undergraduate Research in Computer Science) (Spring 2023)
 - Created GYD: turns text into knowledge graphs, summaries, and a chat box with fine-tuned LLMs.
- **1st Place at Virginia Tech Kickstart** (Spring 2023)
 - Created **Handsway**, a first-of-its-kind, free non-profit iOS application that uses machine learning to translate American Sign Language signs into text in real time.
 - Received **\$4K+ cash funding** and helped more than **2K+ users**.
- **President of Artificial Intelligence & Machine Learning Club at VT** (Spring 2021 – Fall 2023)
 - Grew the club from 20 to 550+ members and hosted AWS Deep Racer competitions with **Peraton**, and gave hands-on ML lectures and coding tutorials.
- **Advisor of the Virginia Tech CS Dean Student Advisory Board** (Fall 2022)
- **President of Vawter Hall** (Virginia Tech on-campus dorm) (2019 – 2020)

Technical Skills

- **Cloud & Infrastructure:** AWS, GCP, Linux, Docker, Kubernetes, Ansible, Terraform, CI/CD Pipelines.
- **Backend:** Java, Spring, Apache Camel, IBM webMethods, PL/SQL, C#, Python, REST APIs.
- **Frontend:** Angular, JavaScript, TypeScript, Swift, Flutter.
- **AI/ML:** LangChain, RAG, multi-agent systems, LLM Orchestration, CNN/RNN/KNN models, Agentic workflows.
- **DevOps & CI/CD:** Jenkins, GitHub workflows; Microservices, Reactive and Message-based architecture.

Education

- **Virginia Tech**, Blacksburg, VA (Fall 2019 – Spring 2023)
B.S. in Computer Science & B.S. in Applied Discrete Mathematics
